

I met Dr. Sheldon in the early 80's when I was working for a local dentist. We referred our periodontal patients to Dr. Sheldon, and I had the highest regard for him. I became a patient in January 2008, after being referred by my family dentist. From the time of my first appointment, the office staff treated me as though I was a friend, not just a patient. They were friendly and welcoming and made me feel very comfortable and at ease.

Dr. Sheldon explained my options and went over the entire procedure. I received seven (7) implants, and all during surgery he would explain what he was doing and exactly what I could expect to feel in the way of pressure, etc. The surgery went very well, and my recovery was excellent. I did not have any problems with the surgery, and I really did not even have any discomfort after surgery.

I am so grateful to Dr. Sheldon and his staff for making this experience one that I could look back on and feel so good about it and know that I received the best of care. I love my implants. They are the next best thing to the real thing, and I am so appreciative. The results far outweigh the cost.

It is without hesitation or reservation that I highly recommend Dr. Sheldon and his staff.
