## ★ ★ Success Story ★ ★ ★

The dentist's chair is one of my least favorite places except for a teeth cleaning. So when I found out I had to have the remainder of my front tooth removed, bone and skin grafting and cosmetic dentistry I was not too happy. After researching dental specialists I decided that I wanted Dr. Lee Sheldon to do my surgery. I have never had any oral surgery without general anesthesia so when Dr. Sheldon told me I would not need any I was very apprehensive. However, Dr. Sheldon has such a way about him that I believed him and he was true to his word.

The entire "journey" took 9 months from beginning to end. The worst, the initial procedure, was the removal of the tooth, and bone and skin grafting. I had to wear a special guard to cover my gums so none of the sutures were disturbed. However, I was pain free and Dr. Sheldon always called after surgery to check on how I was doing. Dr. Sheldon's office is state-of-the-art with a friendly, personable, and knowledgeable staff. After waiting about 4 months to see if the grafting took, it was time to have an implant. I was a bit nervous, but again, Dr. Sheldon was true to his word, another painless and quick procedure. Nine months later and some cosmetic dentistry I have a beautiful smile!

My experience with Dr. Sheldon, Dr. Amir and staff has been top notch. They will always have my highest recommendation.
