Success Story

Leigh Anne Fielding

I have never been the type to gamble or play the stock market, but if I did I would have invested in the product "Fixodent!"

Literally I went thru a couple of tubes a month.

Even then I "couldn't leave home without it!"

After each meal I would have to re-glue.

I lived ^{this way} ~~the~~ for the past 11-12 years. I didn't think that I would or could enjoy food again. I just thought that this was the "norm" for all denture wearers.

It got to the point to where I would even

have to reglue after eating a peanut butter and jelly sandwich.

So I went to see my Dentist to see what I could do about my predicament. He told me about a new way to wear dentures and never needing to wear adhesive again. I thought "yea right." But I listened anyway. He set me up an appointment with Dr. Lee Sheldon and he explained the whole process called "dental implants." Little did I know this would be my ticket back to the "Garden of Eating" after all these years.

Well I am a proud owner of a set of

implants and since then I took a bite of the best & most expensive apple I have ever eaten. And boy was it worth the wait and any amount of money. As a matter of fact it was worth ever pretty penny I ever earned.

I am biting into every kind of food I enjoyed when I had all of my own teeth.

Having dental implants are truly the next best thing to having your own teeth.

As a matter of fact I am eating better & healthier food now that I am able to enjoy "mother nature's best!"
