Having seen both of my parents go through periodontal treatments over 30 years ago, I had been putting off having gum surgery for years ... every excuse in the book except the truth - absolute fear!! Once it got to the point that even a cleaning caused me so much discomfort that I hurt for days afterward, I finally made the decision that it was time to do something or risk losing my natural teeth. I am now 3 months post-surgery and just had my first completely pain-free cleaning ... and I am so relieved that I finally made the long overdue decision to do this.

I would never have even considered anyone other than Dr. Sheldon and his excellent staff to trust my teeth and health to, and I am so very happy to say that I made the right choice and am indeed a "success story"!

My words of wisdom to anyone hesitating to undergo pro-active periodontal treatment by Dr. Sheldon are "don't wait". Trust me - the alternative will be more expensive and much more painful!
