

February 2, 2005

A few years ago I was referred to Dr. Sheldon. I have to say that this was the best thing that has ever happened to me. I have seen several Periodontists over the years, but none have helped me. One in particular wanted to operate on my sinus cavity, remove all my teeth, and replace my original teeth with implants all for the ridiculous sum of \$22,000.

Dr Sheldon treated my condition with state of the art medications, and by scaling my gums and teeth he was able to save my most precious possessions. When he first started my two front teeth were loose and I thought it was too late for them to be saved but thanks to Dr. Sheldon I not only have my teeth, I can enjoy eating a crisp piece of fruit, or corn on the cob and not worry.

Since my first visit I have had tissue transplanted from the roof of my mouth to my gums on the lower front, all the tissue has adhered and this is another success story for Dr. Sheldon.

Dr. Sheldon's staff is not only professional but they really treat you like you are a family member, with care and concern. I will always be grateful for the wonderful job Dr. Sheldon has done for me.

Sincerely,

Michael Morgan
